Amendments to the Claims: This listing of Claims replaces all previous versions.

- 1. (Original) A method for reducing the level of asparagine in coffee beans, comprising adding an asparagine-reducing enzyme to coffee beans.
- 2. (Original) The method of claim 1, wherein said asparagine-reducing enzyme is asparaginase.
- 3. (Original) The method of claim 1, wherein the level of asparagine is reduced by at least about 10%.
- 4. (Original) The method of claim 1, wherein said asparagine-reducing enzyme is an enzyme capable of hydrolyzing the amide group of free asparagine.
- 5. (Original) A method for reducing the level of asparagine in coffee beans, comprising:
 - (1) providing coffee beans containing asparagine;
 - (2) optionally pre-treating the coffee beans;
 - (3) adding an asparagine-reducing enzyme to the coffee beans;
 - (4) allowing a sufficient time for the enzyme to react with the asparagine; and
 - (5) optionally deactivating or optionally removing the enzyme.
- 6. (Original) Coffee beans comprising less than about 500 ppm asparagine.
- 7. (Original) Coffee beans comprising less than about 300 ppm asparagine.
- 8. (Original) Coffee beans comprising less than about 200 ppm asparagine.
- 9. (Original) Coffee beans comprising less than about 100 ppm asparagine.
- 10. Cancelled
- 11. (Original) The method of claim 10, wherein reducing the level of acrylamide in the roasted coffee beans comprises adding an asparagine-reducing enzyme to coffee beans.
- 12. (Original) The method of claim 11, wherein said asparagine-reducing enzyme is asparaginase.
- 13. (Original) The method of claim 11, wherein said asparagine-reducing enzyme is an enzyme capable of hydrolyzing the amide group of free asparagine.
- 14. (Original) A method for reducing the level of acrylamide in roasted coffee beans, comprising:
 - (1) providing coffee beans containing asparagine;
 - (2) optionally pre-treating the coffee beans;
 - (3) adding an asparagine-reducing enzyme to the coffee beans;
 - (4) allowing a sufficient time for the enzyme to react with the asparagine;
 - (5) optionally deactivating or optionally removing the enzyme; and
 - (6) roasting the coffee beans to form roasted coffee beans.

- 15. (Original) Coffee beans, wherein the level of asparagine in said coffee beans is reduced by at least about 10%.
- 16. (Original) The coffee beans of claim 15, wherein the level of asparagine in said coffee beans is reduced by at least about 30%.
- 17. (Original) The coffee beans of claim 16, wherein the level of asparagine in said coffee beans is reduced by at least about 50%.
- 18. (Original) The coffee beans of claim 17, wherein the level of asparagine in said coffee beans is reduced by at least about 70%.
- 19. (Original) The coffee beans of claim 18, wherein the level of asparagine in said coffee beans is reduced by at least about 90%.
- 20. (Original) Roasted coffee beans, wherein the level of acrylamide in said roasted coffee beans is reduced by at least about 10%.
- 21. (Original) The roasted coffee beans of claim 20, wherein the level of acrylamide in said roasted coffee beans is reduced by at least about 30%.
- 22. (Original) The roasted coffee beans of claim 21, wherein the level of acrylamide in said roasted coffee beans is reduced by at least about 50%.
- 23. (Original) The roasted coffee beans of claim 22, wherein the level of acrylamide in said roasted coffee beans is reduced by at least about 70%.
- 24. (Original) The roasted coffee beans of claim 23, wherein the level of acrylamide in said roasted coffee beans is reduced by at least about 90%.
- 25. (Original) Roasted coffee beans comprising less than about 160 ppb acrylamide
- 26. (Original) Roasted coffee beans comprising less than about 150 ppb acrylamide
- 27. (Original) Roasted coffee beans comprising less than about 135 ppb acrylamide.
- 28. (Original) Roasted coffee beans comprising less than about 120 ppb acrylamide.
- 29. (Original) Roasted coffee beans comprising less than about 100 ppb acrylamide.
- 30. (Original) Roasted coffee beans comprising less than about 50 ppb acrylamide.
- 31. (Original) Roasted coffee beans comprising less than about 20 ppb acrylamide.
- 32. (Original) Roasted coffee beans comprising less than about 10 ppb acrylamide.
- 33. (Original) A product comprising roasted coffee beans, wherein the level of acrylamide in said product is reduced by at least about 10%.

- 34. (Original) The product of claim 33, wherein the level of acrylamide in said product is reduced by at least about 30%.
- 35. (Original) The product of claim 34, wherein the level of acrylamide in said product is reduced by at least about 50%.
- 36. (Original) The product of claim 35, wherein the level of acrylamide in said product is reduced by at least about 70%.
- 37. (Original) The product of claim 36, wherein the level of acrylamide in said product is reduced by at least about 90%.
- 38. (Original) The product of claim 33, wherein said product is roasted coffee beans.
- 39. (Original) The product of claim 38, wherein said product is roast and ground coffee.
- 40. (Original) Roast and ground coffee, wherein said roast and ground coffee comprises less than about 160 ppb acrylamide.
- 41. (Original) Roast and ground coffee, wherein said roast and ground coffee comprises less than about 150 ppb acrylamide.
- 42. (Original) Roast and ground coffee, wherein said roast and ground coffee comprises less than about 135 ppb acrylamide.
- 43. (Original) Roast and ground coffee, wherein said roast and ground coffee comprises less than about 120 ppb acrylamide.
- 44. (Original) Roast and ground coffee, wherein said roast and ground coffee comprises less than about 100 ppb acrylamide.
- 45. (Original) Roast and ground coffee, wherein said roast and ground coffee comprises less than about 50 ppb acrylamide.
- 46. (Original) Roast and ground coffee, wherein said roast and ground coffee comprises less than about 20 ppb acrylamide.
- 47. (Original) Roast and ground coffee, wherein said roast and ground coffee comprises less than about 10 ppb acrylamide.
- 48. (Original) A roast and ground coffee brew, wherein said roast and ground coffee brew comprises less than about 7 ppb acrylamide.
- 49. (Original) A roast and ground coffee brew, wherein said roast and ground coffee brew comprises less than about 5 ppb acrylamide.
- 50. (Original) An article of commerce comprising:
 - (a) a product comprising roasted coffee beans, wherein said roasted coffee beans have a reduced level of acrylamide;
 - (b) a container for containing the product; and
 - (c) a message associated with the container.

wherein said message associated with the container informs the consumer that the product has a reduced level of acrylamide.

- 51. (Original) The article of claim 50, wherein said message informs the consumer that the product is low in acrylamide.
- 52. (Original) An article of commerce comprising:
 - (a) a product comprising coffee beans, wherein said coffee beans have a reduced level of asparagine;
 - (b) a container for containing the product; and
 - (c) a message associated with the container.

wherein said message associated with the container informs the consumer that the coffee beans contain a reduced level of asparagine.

- 53. (Original) The article of claim 52, wherein said message informs the consumer that the coffee beans are low in asparagine.
- 54. (Original) An article of commerce comprising:
 - (a) a product comprising roasted coffee beans, wherein said roasted coffee beans have a reduced level of acrylamide;
 - (b) a container for containing the product; and
 - (c) a message associated with the container.

wherein said message associated with the container informs the consumer that the article of commerce has a reduced level of acrylamide.

- 55. (Original) The article of claim 54, wherein said message informs the consumer that the article of commerce is low in acrylamide.
- 56. (Original) An article of commerce comprising:
 - (a) a product comprising coffee beans, wherein said coffee beans have a reduced level of asparagine;
 - (b) a container for containing the product; and
 - (c) a message associated with the container.

wherein said message associated with the container informs the consumer that the article of commerce contains a reduced level of asparagine.

57. (Original) The article of claim 56, wherein said message informs the consumer that the article of commerce is low in asparagine.
